

## **Facts about TECHNOMELT® KS 922**

- + Edge glue for all materials
- + Does not require additional equipment
- + Possibility of ultra-thin glue joint
- + High heat resistance
- + Resistant to moisture

# **TECHNOMELT® KS 922**

## TECHNOMELT® KS 922

TECHNOMELT® KS 922 is a new technology within edge glue, which can be applied by traditional edge gluing equipment. An ultra-thin and strong glue joint can be achieved and is suitable for medium and high speed machinery.

Compared to EVA based products, the heat resistance, solvent resistance and adhesion significantly improved.

The product is very close to the quality of PUR Hotmelt.
